SITOP PSU100L/1AC/24VDC/5A

SITOP PSU100L 24 V/5 A Stabilized power supply input: 120/230 V AC, output: 24 V DC/5 A

| input | | | | |
|--|--|--|--|--|
| type of the power supply network | 1-phase AC | | | |
| supply voltage at AC | Set by means of selector switch on the device | | | |
| supply voltage | 120 V/230 V | | | |
| input voltage 1 at AC | 93 132 V | | | |
| input voltage 2 at AC | 187 264 V | | | |
| wide range input | No | | | |
| overvoltage overload capability | 2.3 × Vin rated, 1.3 ms | | | |
| buffering time for rated value of the output current in the event of power failure minimum | 20 ms | | | |
| operating condition of the mains buffering | at Vin = 93/187 V | | | |
| line frequency | 50/60 Hz | | | |
| line frequency initial value | 47 63 Hz | | | |
| line frequency full-scale value | | | | |
| input current | | | | |
| at rated input voltage 120 V | 2.1 A | | | |
| at rated input voltage 230 V | 1.15 A | | | |
| current limitation of inrush current at 25 °C maximum | 32 A | | | |
| duration of inrush current limiting at 25 °C | | | | |
| • typical | 3 ms | | | |
| l2t value maximum | 0.8 A ² ·s | | | |
| fuse protection type | T 3,15 A/250 V (not accessible) | | | |
| fuse protection type in the feeder | Recommended miniature circuit breaker: from 6 A characteristic C | | | |
| output | | | | |
| voltage curve at output | Controlled, isolated DC voltage | | | |
| output voltage at DC rated value | 24 V | | | |
| output voltage | | | | |
| at output 1 at DC rated value | 24 V | | | |
| output voltage adjustable | Yes; via potentiometer | | | |
| adjustable output voltage initial value | 22.8 V | | | |
| adjustable output voltage full-scale value | 26.4 V | | | |
| relative overall tolerance of the voltage | 3 % | | | |
| relative control precision of the output voltage | | | | |
| on slow fluctuation of input voltage | 0.1 % | | | |
| on slow fluctuation of ohm loading | 0.5 % | | | |
| residual ripple | | | | |
| • maximum | 150 mV | | | |
| • typical | 50 mV | | | |
| voltage peak | | | | |
| • maximum | 240 mV | | | |

| e typical | 150 m\/ | | | |
|---|---|--|--|--|
| • typical | 150 mV Green LED for 24 V OK | | | |
| display version for normal operation behavior of the output voltage when switching on | Green LED for 24 V OK | | | |
| | Overshoot of Vout approx. 4 % | | | |
| response delay maximum | 1.5 s | | | |
| voltage increase time of the output voltage | 100 | | | |
| • typical | 130 ms | | | |
| output current | | | | |
| rated value | 5 A | | | |
| rated range | 0 5 A; +45 +60 °C: Derating 2%/K | | | |
| supplied active power typical | 120 W | | | |
| bridging of equipment | Yes | | | |
| number of parallel-switched equipment resources for increasing the power | 2 | | | |
| efficiency in percent | 86 % | | | |
| power loss [W] | | | | |
| at rated output voltage for rated value of the output | 17 W | | | |
| current typical | | | | |
| closed-loop control | | | | |
| relative control precision of the output voltage with rapid | 0.3 % | | | |
| fluctuation of the input voltage by +/- 15% typical | | | | |
| relative control precision of the output voltage at load step of resistive load 10/90/10 % typical | 2 % | | | |
| setting time | | | | |
| - | 0.4 ma | | | |
| load step 10 to 90% typical | 0.4 ms 0.4 ms | | | |
| load step 90 to 10% typical | 0.4 ms | | | |
| protection and monitoring | 00.V/ | | | |
| design of the overvoltage protection | < 33 V | | | |
| property of the output short-circuit proof | Yes | | | |
| design of short-circuit protection | Constant current characteristic | | | |
| - recencies value surrent limitation tunical | 5 05 A | | | |
| response value current limitation typical | 5.25 A | | | |
| enduring short circuit current RMS value | | | | |
| - | 0.4 | | | |
| • typical | 8 A | | | |
| • typical safety | | | | |
| typical safety galvanic isolation between input and output | Yes | | | |
| typical safety galvanic isolation between input and output galvanic isolation | Yes Safety extra-low output voltage Uout acc. to EN 60950-1 and EN 50178 | | | |
| typical safety galvanic isolation between input and output galvanic isolation operating resource protection class | Yes | | | |
| typical safety galvanic isolation between input and output galvanic isolation operating resource protection class leakage current | Yes Safety extra-low output voltage Uout acc. to EN 60950-1 and EN 50178 Class I | | | |
| typical safety galvanic isolation between input and output galvanic isolation operating resource protection class leakage current maximum | Yes Safety extra-low output voltage Uout acc. to EN 60950-1 and EN 50178 Class I 3.5 mA | | | |
| typical safety galvanic isolation between input and output galvanic isolation operating resource protection class leakage current maximum typical | Yes Safety extra-low output voltage Uout acc. to EN 60950-1 and EN 50178 Class I 3.5 mA 0.4 mA | | | |
| typical safety galvanic isolation between input and output galvanic isolation operating resource protection class leakage current maximum typical protection class IP | Yes Safety extra-low output voltage Uout acc. to EN 60950-1 and EN 50178 Class I 3.5 mA | | | |
| typical safety galvanic isolation between input and output galvanic isolation operating resource protection class leakage current maximum typical protection class IP standard | Yes Safety extra-low output voltage Uout acc. to EN 60950-1 and EN 50178 Class I 3.5 mA 0.4 mA IP20 | | | |
| typical safety galvanic isolation between input and output galvanic isolation operating resource protection class leakage current maximum typical protection class IP standard for emitted interference | Yes Safety extra-low output voltage Uout acc. to EN 60950-1 and EN 50178 Class I 3.5 mA 0.4 mA | | | |
| typical safety galvanic isolation between input and output galvanic isolation operating resource protection class leakage current maximum typical protection class IP standard | Yes Safety extra-low output voltage Uout acc. to EN 60950-1 and EN 50178 Class I 3.5 mA 0.4 mA IP20 | | | |
| typical safety galvanic isolation between input and output galvanic isolation operating resource protection class leakage current maximum typical protection class IP standard for emitted interference for mains harmonics limitation for interference immunity | Yes Safety extra-low output voltage Uout acc. to EN 60950-1 and EN 50178 Class I 3.5 mA 0.4 mA IP20 | | | |
| typical safety galvanic isolation between input and output galvanic isolation operating resource protection class leakage current maximum typical protection class IP standard for emitted interference for mains harmonics limitation | Yes Safety extra-low output voltage Uout acc. to EN 60950-1 and EN 50178 Class I 3.5 mA 0.4 mA IP20 EN 55022 Class A - | | | |
| typical safety galvanic isolation between input and output galvanic isolation operating resource protection class leakage current maximum typical protection class IP standard for emitted interference for mains harmonics limitation for interference immunity | Yes Safety extra-low output voltage Uout acc. to EN 60950-1 and EN 50178 Class I 3.5 mA 0.4 mA IP20 EN 55022 Class A - | | | |
| typical safety galvanic isolation between input and output galvanic isolation operating resource protection class leakage current maximum typical protection class IP standard for emitted interference for mains harmonics limitation for interference immunity standards, specifications, approvals | Yes Safety extra-low output voltage Uout acc. to EN 60950-1 and EN 50178 Class I 3.5 mA 0.4 mA IP20 EN 55022 Class A - | | | |
| typical safety galvanic isolation between input and output galvanic isolation operating resource protection class leakage current maximum typical protection class IP standard for emitted interference for mains harmonics limitation for interference immunity standards, specifications, approvals certificate of suitability | Yes Safety extra-low output voltage Uout acc. to EN 60950-1 and EN 50178 Class I 3.5 mA 0.4 mA IP20 EN 55022 Class A - EN 61000-6-2 | | | |
| typical safety galvanic isolation between input and output galvanic isolation operating resource protection class leakage current maximum typical protection class IP standard for emitted interference for mains harmonics limitation for interference immunity standards, specifications, approvals certificate of suitability CE marking | Yes Safety extra-low output voltage Uout acc. to EN 60950-1 and EN 50178 Class I 3.5 mA 0.4 mA IP20 EN 55022 Class A - EN 61000-6-2 Yes | | | |
| typical safety galvanic isolation between input and output galvanic isolation operating resource protection class leakage current maximum typical protection class IP standard for emitted interference for mains harmonics limitation for interference immunity standards, specifications, approvals certificate of suitability CE marking UL approval | Yes Safety extra-low output voltage Uout acc. to EN 60950-1 and EN 50178 Class I 3.5 mA 0.4 mA IP20 EN 55022 Class A - EN 61000-6-2 Yes Yes; cULus-Listed (UL 508, CSA C22.2 No. 107.1), File E197259 | | | |

| security information | |
| security information | Siemens provides products and solutions with industrial security functions that |
| | support the secure operation of plants, systems, machines and networks. In order to protect plants, systems, machines and networks against cyber threats, it is necessary to implement – and continuously maintain – a holistic, state-of-the-art industrial security concept. Siemens' products and solutions constitute one element of such a concept. Customers are responsible for preventing unauthorized access to their plants, systems, machines and networks. Such systems, machines and components should only be connected to an enterprise network or the internet if and to the extent such a connection is necessary and only when appropriate security measures (e.g. firewalls and/or network segmentation) are in place. For additional information on industrial security measures that may be implemented, please visit https://www.siemens.com/industrialsecurity. Siemens' products and solutions undergo continuous development to make them more secure. Siemens strongly recommends that product versions are used. Use of product versions that are |

| | | | no longer supported, and failure to apply the latest updates may increase customer's exposure to cyber threats. To stay informed about product updates subscribe to the Siemens Industrial Security RSS Feed under https://www.siemens.com/cert. (V4.6) | | | |
