REPORT

7P Series

Retaining System for SPDs with replaceable modules.
Conforms to EN 61643-11:2012.

new

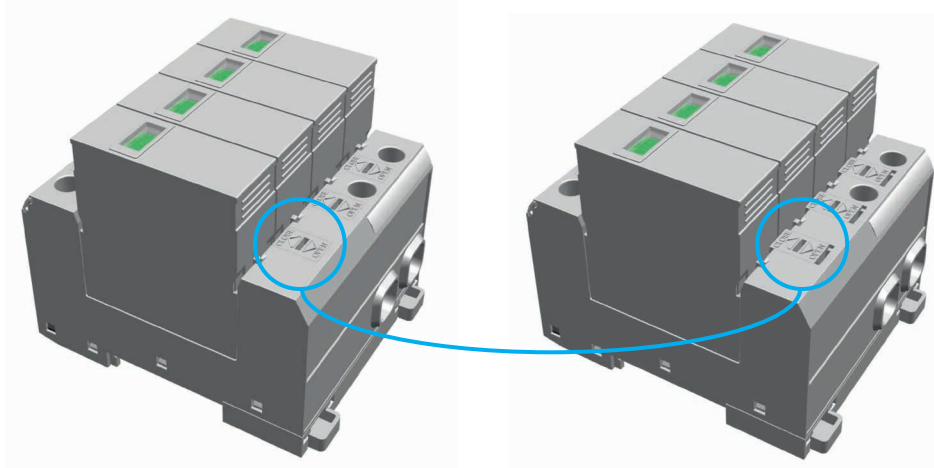

Features

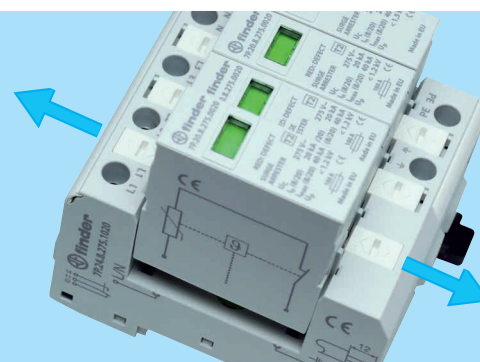

- Suitable for applications under vibration
- Prevents unauthorised replacement of module
- Available with or without remote signalling connector

In "open" position, it's a standard SPD and you can extract and insert replaceable module. Moving the slide in "close" position, the replaceable module is locked and impossible to extract.

Retaining system activated: impossible to extract the replaceable module.

Move the retaining slide to remove the replaceable module.
